Hand-Held Infrared Heat Gun

PORTABLE:

Lightweight aluminum construction

ENERGY EFFICIENT:

Instant ON/OFF electric infrared

ERGONOMICAL:

Easy to grip on-off switch and handle

120 VAC:

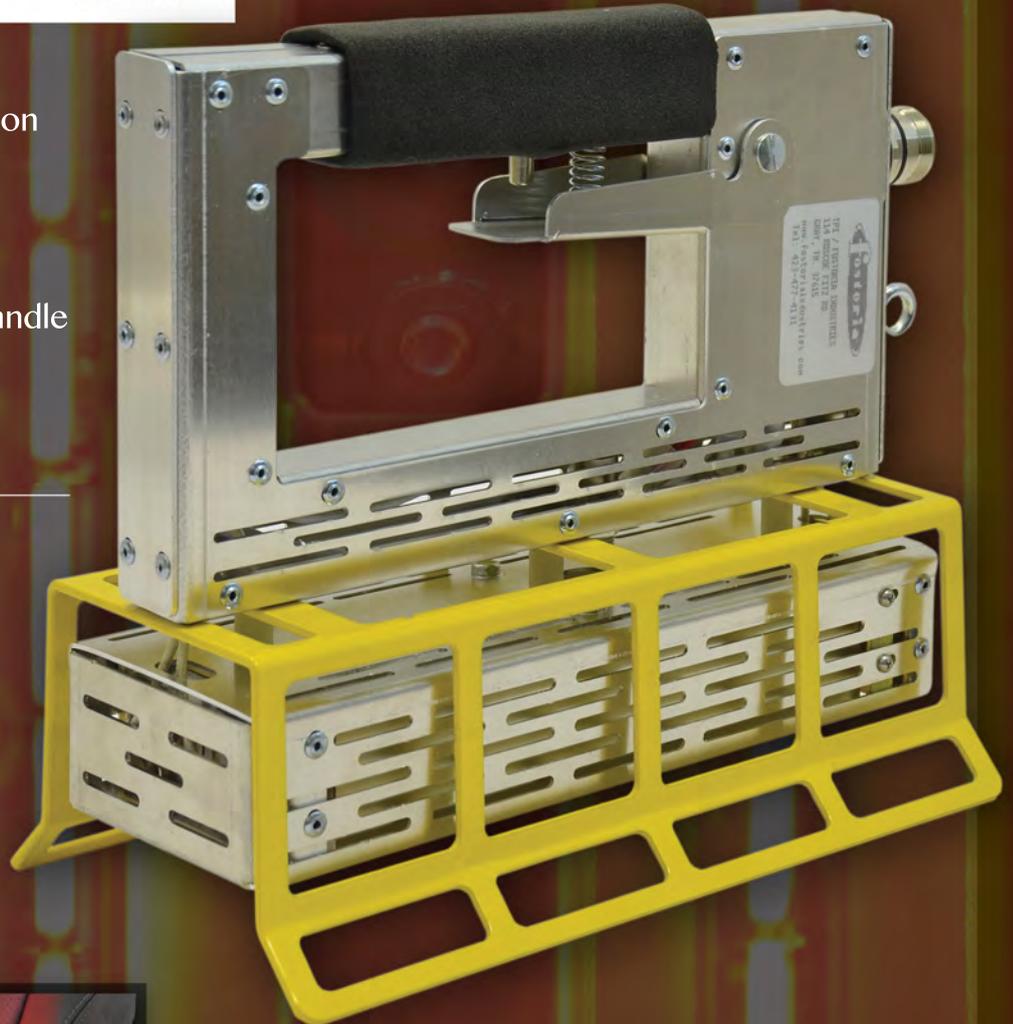

Plugs into any standard 120V grounded outlet

APPLICATIONS:

De-wrinkle and relax automotive seat trim in hard-to-reach "bite" areas. Ideal for cloth, vinyl, and leather

Provide instant spot heat where instant and controlled heat is required.

Effective for spot curing of retouched paint or other finishes

SPECIFICATIONS:

(2) 500 W, 120V, 8.4A short-wave infrared, T-3 tungsten lamps included. ● Aluminum construction | weight is less than 3 pounds. Gold anodized aluminum reflector. ● 18/3 grounded 20 foot cordset and NEMA plug with GFCI. ● Flip lever switch, easy to grip & energize/de-energize instantly. ● Heated area can be as small as 6" long X 2" wide | heated footprint varies with distance from product. ● Standard protective wire guard.

Model:
RHG-1012-C

FEATURES:

- Complete 'Closed-Loop' control system for guaranteed accurate surface temperatures on the product. Heat gun incorporates a radiometer (optical pyrometer) to read surface temperatures of the product being heated, and the temperatures are verified via the large digital readout in the control box.
- Provides the precise control of an IR oven system in the palm of your hand.
- Operator can pre-set the required temperature, and the heat gun will monitor and maintain the preset temperature. Prevents overheating and damaging of the product.
- Lightweight - - easy to use and control. Instant ON-OFF heat.

SPECIFICATIONS MODEL RHG-1012-C:

- Incorporates (2) 500 Watt, 120 Volt, 8.4 total amps; short-wave infrared, T-3 tungsten lamps included. Snap in connection, designed by Fostoria Engineers, for easy and quick replacement.
- Gold anodized aluminum reflector.
- 18/3 grounded 20 foot cordset from receptacle to control box.
- Connector cable from control box to the heat gun allows for easy disconnect and quick removal for maintenance or storage.
- Flip-lever switch with 2-finger control.
- Protective wire guard standard, as pictured.
- Precise heated footprint, as small as 2" X 6". Heated area will increase proportionally with distance from the product.
